

TP4

Support: phase 20 vice base

procedure:

- open the assembly : **sole_ph20_montage_complet** -
- hide the **machined base ph10** - Insert the "**machined base**" giving it the same constraints as the raw base. save the assembly under the name "**montage_semelle_ph20_complet**"

assembly tree "montage_semelle_ph20_complet"

phase 20 sole range
